

REMARKS

Claims 1, 6 and 7 remain in this application. Claims 2-5 and 8-13 have been amended by eliminating multiple dependent claims and deleting preferably clauses. Attached hereto is a marked-up version of the changes made to the claims by the current amendment. The attached page is captioned "Version With Markings to Show Changes Made".

The support for these amendments is found in the claims as originally filed. These amendments are being entered to bring the claims into conformance with, *inter alia*, 37 CFR §1.75; no new matter is added.

Respectfully submitted,

By

## VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the claims:

1. A laundry detergent and/or fabric care composition comprising a polymer and a chemical entity comprising a deposition aid having a high affinity for cellulose and a benefit agent.
2. A laundry detergent and/or fabric care composition according to claim 1 wherein said deposition aid is selected from an enzyme [, preferably an enzyme binding domain, more preferably an amino acid sequence comprising a cellulose binding domain ].
3. A composition according to claim 2 wherein said amino acid sequence comprising a cellulose binding domain is selected from CBDs CBHII from *Trichoderma reesei*, CBDs CenC, CenA and Cex from *Cellulomonas fimi*, CBD CBHI from *Trichoderma reesei*, CBD Cellulozome from *Clostridium cellulovorans*, CBD E3 from *Thermomonospora fusca*, CBD-dimer from *Clostridium stecorarium* (NCIMB11754) XynA, CBD from *Bacillus agaradherens* (NCIMB40482), CBD family 45 from *Humicola insolens*, and/or mixtures thereof [; preferably selected from CBD CenC from *Cellulomonas fimi*, CBD Cellulozome from *Clostridium cellulovorans*, CBD family 45 from *Humicola Insolens*, and/or mixtures thereof ].
4. A composition according to claim 1 [claims 1-3] wherein said benefit agent is selected from perfumes, hygiene agents, insect control agents, fabric softening agents, soil release agents, bleaching agents, dye fixatives agents, brighteners, latex, resins, and/or mixtures thereof [, preferably from perfumes, hygiene agents, insect control agents, and/or mixtures thereof ].
5. A composition according to claim 1 [claims 1-4] wherein said chemical component is linked to said deposition aid via a linking region.
6. A composition according to claim 5 wherein said linking region is a amino acid linking region.
7. A composition according to claim 5 wherein said linking region is a polymer selected from PEG(NPC)2, (NH2)2-PEG, t-BOC-NH-PEG-NH2, MAL-PEG-NHS and/or VS-PEG-NHS polymers.

8. A composition according to claim 1 [any of the preceding claims] wherein said chemical component is linked to said deposition aid or to said linking region via a weak bond.
9. A composition according to claim 1 [any of the preceding claims] wherein said chemical entity is comprised at a level of from 0.00001% to 50% [, preferably from 0.001% to 20%, more preferably from 0.1% to 10%] by weight of the total composition.
10. A composition according to claim 1 [any of the preceding claims] wherein said polymer is selected from soil release polymers, dispersants, anti-redeposition polymers, dye transfer inhibitor polymers, flocculant polymers, and/or mixtures thereof.
11. A method of treating a fabric with a composition comprising a chemical entity and a polymer according to claim 1 [claims 1-10], for providing sanitation and/or insect control.
12. A method of treating a fabric with a composition comprising a chemical entity and a polymer according to claim 1 [claims 1-10], for providing fabric cleaning including stain/soil removal, anti-redeposition of soils and/or whiteness maintenance.
13. A method of treating a fabric with a composition comprising a chemical entity and a polymer according to claim 1 [claims 1-10], for providing fabric care improved fabric care including color care and/or fabric softness.
